Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Monday 13 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Another cloudy day, with patchy rain at times.

Today:
A cloudy start for all, with outbreaks of rain spreading across the region through the morning. Remaining cloudy but becoming drier for most into the afternoon, with rain easing and becoming more intermittent. Maximum temperature 18 deg C (64 deg F).

Tonight:
Staying largely dry but cloudy through the evening, before further rain moves northwards into the region overnight, affecting most by morning. Minimum temperature 12 deg C (54 deg F).

Tuesday:
A wet day, as rain becomes heavier and more widespread through the morning, with the odd thundery outbreak possible. This rain lingers throughout before clearing from the south overnight. Maximum temperature 20 deg C (68 deg F).

Outlook for Wednesday to Friday:
Misty starts in places on Wednesday and Thursday, then becoming fine and largely dry with sunny spells, feeling warm in these. Wet and windy Friday morning, becoming drier later.
